Profile Summary

MERN Stack Developer with 1.3 year of hands-on experience in building scalable and high-performance web applications. Skilled in designing and integrating RESTful APIs, microservices, and backend services using Node.js (Express.js). Strong expertise in database management with PostgreSQL, MongoDB, and Prisma. Experienced in system integration, authentication, and ensuring seamless communication between frontend and backend systems. Also, Familiar with testing tools like Jest, Puppeteer and Playwright and work with them efficiently

Education

MCA, 2024

Hindusthan College of Arts and Science, Coimbatore

B.C.A., 2022

St. Xavier's College (Autonomous), Palayamkottai, Tirunelveli

Work Experience

May 2024 - Jul 2025

Mern Stack Developer

Digisailor

Full Stack Software Engineer with 1+ years of experience delivering enterprise-grade projects for clients including ANZ Bank and Ipspatial Techno Solutions. Proficient in Next.js, React, Node.js, Spring Boot, and PostgreSQL, with a strong focus on building scalable, production-ready applications. Experienced in system design, automated testing, and cloud-based observability. Passionate about designing modern architectures and delivering high-performance, user-friendly solutions end-to-end.

Internship

5 Months

Dna as a Storage Medium for Efficient and Reliable Cloud Data Archiving

The Mind IT Solution

- Spearheaded research on utilizing DNA as a storage medium, contributing to the development of innovative solutions for efficient and reliable cloud data archiving over a 5-month internship duration

- Collaborated with cross-functional teams to design and validate a proof-

Key skills

- Javascript
- Npm
- CSS
- Expressjs
- Restful Web API Development
- Microservices
- Node.js
- Docker
- Redux
- Jest
- Jwt
- Hooks
- Nextjs
- Optimization
- React.js
- SPA
- MongoDB Atlas
- Nosql Databases
- Javascprit
- Playwright Automation
- Puppeteer
- Github Actions
- Ci/Cd
- TypeScript

of-concept model, improving data retrieval accuracy and reducing storage costs by an anticipated margin

Projects

5 Months

Aldaleela

Developed a Web Application using React and .NET, featuring a predefined Dubai map view with client-created places, detailed information, and geo-coordinates — similar to Google Maps functionality. Worked as a Frontend Developer and contributed to the integration of backend APIs with the frontend, collaborating closely with the client to ensure seamless data flow, accurate map rendering, and enhanced user experience.

6 Months

ANZ Dev Portal

- Developed and optimized the ANZ Dev Portal over a 6-month period, enhancing user experience and increasing developer engagement by approximately 25%
- Implemented scalable features and streamlined portal functionalities, resulting in a 30% reduction in API integration time
- Collaborated with cross-functional teams to deliver project milestones within deadlines, improving overall project delivery efficiency by 20%
